How to Properly Place Garbage Bins on Collection Day

This new collection method requires residents to place their bins in a specific way.

STEP 1

CLOSE THE LID & ROLL TO END OF DRIVEWAY.

Place all items in trash bags in the bin(s) and make sure the lid is completely closed. ROLL the bin to the edge of the curb/driveway.

Make sure no obstructions are above the bin.

In wintertime, please make sure the bin is not on the road and in the path of the snowplow. And that the lid is cleared of snow and ice.

STEP #2

MAKE SURE THE BIN HANDLE IS FACING YOUR HOME.

Place the bin(s) with the wheels and handle facing you house and the lid opening facing the street.

STEP #3

BINS MUST HAVE 3 TO 5 FEET OF SPACE.

Make sure there is nothing in front of the bin. There must be a space of 3 to 5 feet on all sides of the bin(s). **DO NOT** place any trash on the lid or beside the bin. **DO NOT** put recycling in this bin. All garbage must be in a bag inside the bin with the lid completely closed.

If your bin is not placed in the correct manner, or if there is recycling in it, our Public Works workers may not collect your garbage. Please return your bin to your house within 24 hours. **Any damage to the bin will be the responsibility of the property owner.**
